

# NutriEva® EVA bags

For total parenteral nutrition  
and chemotherapy

## For total parenteral nutrition and chemotherapy

### Intended use

Meditalia's bags are used for administration of nutritive solutions and chemotherapy drugs.

Our company know-how and its technical management, backed by a highly efficient and equipped in-house laboratory, permit us to exclusively produce customized bags to satisfy our customers' size and functional needs through:

- Colour: EVA natural or amber colour (to guarantee protection from light for photosensitive solutions).
- Different types of connections available.
- EtO or Gamma sterilizable.
- Customized size and dimension
  - **250 ml capacity**
  - **500 ml capacity**
  - **1000 ml capacity**
- Printed / not printed options available, with customizable printing.

Meditalia's EVA bags are made of Solutran NutriEVA®, a medical grade Ethyl-Vinyl-Acetate that meets all the international requirements for the manufacturing process of bags.

Meditalia's EVA bags packaging and labelling are in compliance with the GMP standards, European Pharmacopea Sect. 3.1.7, and ISO 10993.
