

# NutriEva®

*E.V.A. enteral nutrition bags*  
*E.V.A. parenteral nutrition bags*  
*E.V.A. chemotherapy solutions bags*

## NutriEva®

**NutriEVA®** is Meditalia srl's brand of tubulars and tubes to be used in the nutrition bags sector: enteral and parenteral nutrition bags, as well as in the chemotherapy sector.

**NutriEVA®** tubulars and tubes, made in E.V.A. - Ethylene-VinylAcetate - offer a high level of workability during the nutrition bags and filling kit manufacturing process, due to its very good plasticity and tear resistance properties.

**NutriEVA®** retains optimal chemical stability to any nutrients as well as fats.

**NutriEVA®** is suitable for:

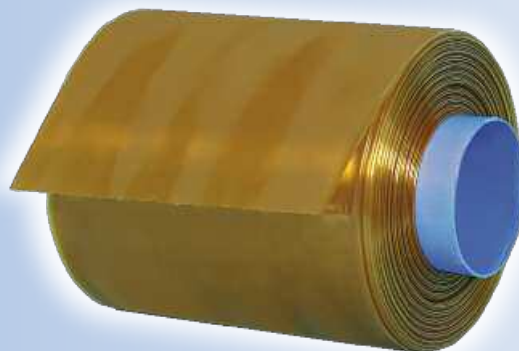

- **Nutrition Set** used for quite liquid solutions dispensed to patients through a giving set by gravity
- **Nutrition Set** used for more dense solutions dispensed to patients through a pump
- **Nutrition Set** used for light sensitive solutions

**NutriEVA®** can satisfy any customer requests:

**Thickness:** from 0,30 to 0,35 mm

**Width:** from 200 mm to 400 mm

**Colour:** - transparent  
- amber for light sensitive solutions
